

RECOMMENDATION

Based on the completed Nursing Education Test Scores, your staff has completed the education.

- **Recommendation:** Congratulations! Your education summary indicates a 5% improvement by your nurses in the transfer of knowledge from Pre-test to Post-test. We hope you will continue to build momentum around the program and sustain its success. Please consider introducing the education to any new staff, or even existing staff as a refresher on how to prevent CAUTI. These comprehensive education and training modules are designed to help improve nursing practice and patient outcomes.
- **Deliverable:** If you need assistance in re-introducing the educational platform or any of the other components, please contact your Program Manager, Lisa Marsek.
